

Art's Charts

This name comes from my Law School days. I made charts of all my classes to better remember issues and law. My fellow students called them "Arts Charts"

Just some updates. I want to encourage you to go to my website. I recently re-did it and added some new features.

I started doing Pod Casts. Only one there so far but I will be doing more in the coming days.

There are also documents you can download that may help in Estate Administration and record keeping.

I still have the "Interesting Links" section. I post links to interesting sites, "no politics" and businesses. If you would like me to add your business or site please let me know and I will be glad to do so.

What's not there are all the skuzzy pop up ads and silly quizzes like "Take this quiz to see what kind of tree you are".

I hope you will check it out.

This is a picture of Gold Point, Nevada. My brothers and I were there over the Independence Day weekend. It's a ghost town in the high desert of Nevada. We have property and cabins there. No phones, no internet. Just our dune buggies, jeeps and motorcycles and lots of places to explore. Great getaway.

Do you have a friend or family member who has not done any estate planning?

ONE OF THE BEST COMPLIMENTS I GET ARE REFERRALS. I TREAT THEM WITH THE SAME RESPECT AND ATTENTION TO THEIR NEEDS AS I DO WITH ALL MY

CLIENTS. MY PROMISE TO YOU IS THEY WILL THANK YOU FOR SENDING THEM TO ME.

George Bernard Shaw: When Shaw died, he made sure his legacy will live on forever. He left money behind to fund a brand new alphabet which he wanted to be called the "Shaw Alphabet". His conditions? The alphabet must have at least 40 letters, be phonetic, and be distinctly different from the Latin alphabet. His alphabet was realized in 1950.

You can look it up and it does actually exist. Now, I don't think anyone will be writing songs about it. Like:

BA bay, BE be, BI bickybi, BO bo, bickybibo, BU bu, bickybibobu.

You have to be my age and like the Three Stooges to get that one.

Gene Roddenberry: The creator of Star Trek requested a space burial in his Will. He eventually got his wish when in 1997, his remains became the first to be launched into space. Roddenberry's wife's remains followed in 2009.
